01 About

Engineering UA creatives for **Cooking Fever** (500M+ downloads, 15M monthly players) and **Airplane Chefs** — Nordcurrent's global hits. Full-cycle ownership from concept to delivery, with performance validated through A/B testing across Tier-1 markets.

I build AI production pipelines: scripts and storyboards with LLMs, assets in Seedream / Flux Kontext, animation in Kling / Seedance, final polish in After Effects — so more concepts reach testing, faster.

02 Experience

NORDCURRENT
2019 — 2026

Motion Designer

Drove creative strategy through competitive landscape analysis, identifying winning patterns and whitespace opportunities in casual gaming UA. Developed concept hypotheses and hook frameworks grounded in viewer behavior and platform-specific engagement signals. Owned A/B testing cycles to optimize CPI/ROAS across Tier-1 markets (US/UK/DE). Built AI production pipelines: scripts with Claude, assets in Seedream / Flux Kontext, animation in Kling / Seedance; automated After Effects scripting and video adaptations. End-to-end control from brief to delivery.

SELF-EMPLOYED
2012 — Present

Motion & Graphic Designer

Motion content, advertising graphics and digital asset production for various media platforms.

SELF-EMPLOYED
2009 — Present

DJ / Promoter

Creative music curation, production and end-to-end event promotion. Independent label work (Tru Thoughts, Brighton).
